

# 2011 Ford Edge - Blending Technology with Style

The 2011 Ford Edge midsize crossover integrates style and technology with a bolder exterior design freshening and an interior brimming with improved craftsmanship and materials. The list of innovative features is headlined by the arrival of segment-first MyFord™ driver connect technology.

Left-side 4.2-inch color LCD cluster display - Provides the driver with traditional vehicle information

Right-side 4.2-inch color LCD cluster display - Provides the driver with an interface to the infotainment/multimedia system

MyFord Touch 8-inch full-color touch-screen LCD provides interface to multimedia and climate control systems

Standard on the 2011 Edge Limited and 2011 Edge Sport is MyFord Touch with Sony® Audio System, which adds a Sony-designed electronic finish panel with a high-gloss black finish and unique treatment of the touch-sensitive controls

The Sony panel is completely flat (except for the center knob), so the touch cells are executed as circular "landing zones" for the finger

New, bi-functional projector beam headlamps; available HID headlamps

New front end (fenders, hood, fascia, chrome grille)

New, unique taillamps and rear fascia

New, larger 4-inch bright exhaust tips

New 18-inch painted aluminum and chrome-clad and 20-inch premium aluminum chrome-clad wheels available; 2011 Edge Sport has 22-inch aluminum wheels standard

Body-color door handles, integrated Intelligent Access door handle
