

COVID-19 Mask Update for Ford of Canada Facilities

Throughout Canada, the number of positive COVID-19 cases continue to rise. The Omicron variant is highly infectious and is easier to transmit between people compared with previous variants.

The trifold surgical face masks provided by Ford continue to provide effective protection against the spread of COVID-19. These masks will continue to be provided to you as long as they are needed.

In addition to the Ford-provided masks, we are now offering more options to our team members until further notice. Starting today, team members can choose one of these options when you are at a Ford facility:

- Continue to wear the Ford-provided face mask
- Wear your own N95 or KN95 respirator, without an exhalation valve, instead of the Ford-provided mask. Note that N95 and KN95 respirators come in a variety of styles and sizes. Please ensure your respirator fits snugly on your face and comes from a reliable source.

Remember, masks and respirators are most effective when worn properly. While at work, wear a face mask or respirator that covers your nose and mouth at all times and fits snugly against your face, except when eating or drinking.

Thank you for everything you do each day for a safe, healthy, and viable Ford Motor Company.
