

# COVID-19 Protocol Update

Team,

As we continue to navigate the impact of COVID-19 and monitor community and internal case data, the health and safety of our team remains our top priority. Based on the sharp increase in COVID-19 cases across most of the United States, we are reinstating the face mask protocol, regardless of vaccination status for team members in all U.S. Ford facilities.

## **Effective tomorrow, Wednesday, August 4:**

- **All team members and visitors to any Ford facility in the U.S. will be required to wear face masks, regardless of their vaccination status.** This is a change from the most recent face mask protocol, which had removed the mask requirement for fully vaccinated individuals.
- All team members are still required to complete the daily self-certification survey and continue to comply with social distancing protocols.
- We will continue to monitor case data to determine when we may be able to adjust protocols again.

Ford continues to strongly encourage team members to get vaccinated, if you have not done so already. Please do all you can to stay safe around your community, and we thank you for your ongoing support to keep the health and safety of all team members our priority.

Thank you,

Dr. Francesca Litow, Corporate Medical Director and Wendy Burkett, Global Safety Director
