

Ford On-site COVID-19 Vaccination Clinics Are Now Available For Ford Employees

With Ford’s continued efforts around the health and safety of its employees, on-site COVID-19 vaccine clinics are being made available to all hourly and salary employees.

Ford hourly and salaried employees can schedule their COVID-19 vaccine appointments [HERE](#) at one of four facilities. Please note vaccinations should be scheduled outside of working hours, as employees will not be compensated for this time. However, employees may use paid personal time if scheduled during working hours. This event is for Ford employees only. We encourage family members and Agency Resources to contact their local county for vaccination locations.
